## THE ANCIENT DEAD

### Introduction

"Shemb'akh, yusarra le ferrer del ustibembi. The Fashle-keng vast mordier." – An inscription found on an ancient shield. Unable to decipher what it meant, and much to the horror of the scholars, the shield was melted down for its precious metal.

Petty nobles, destitute villages, roaming monsters. This is not how the world has always been. Long ago, in a different era, perhaps with a different kind of man, a great empire spanned the known world. Provincial lands saw sound governance whether they were in the blistering sands of the south or the harsh frozen tundra of the north. Even with dozens of peoples and cultures, this empire ruled through solidarity and unity. Commerce was strong and a sense of purpose even stronger: that the Empire must last forever, an idea purposed into respected and adored Legions. These soldiers, through overwhelming power, protected the Empire not only from outsiders, but from internal strife.

It is not known how this Empire fell apart. A common belief is that dozens of peoples could never be peaceful beneath one banner, that the sense of tradition and culture would inevitably pull them away from the core rule, like wiry seams unwound from a banner of many colors. However, some scholars believe that the Empire was rotted from within not by politics, but by religion. Cultists, doomsayers, and shamans of all sorts withered the core tenets and ultimately pitched the Empire into total chaos.

But does it matter what brought it down? What is known now is that these ancient dead are rising again, not alive and not yet dead, either. Legions that never tire, legionnaires that know no fear, a cold machine that ever marches forward, to claim again what was once theirs.

### The Ancient Legions

"How would I design the perfect army? I'd start with the perfect warrior: a cold, calculating man who has no fear, does not tire, and will always go where I tell him. Give me a thousand such men and I will conquer the whole world." – Nobleman in response to a scholar's question.

The Ancient Undead armies are spearheaded by their Ancient Legions. This fighting force once swept over the known world, dominating new lands and keeping old ones stable. In the afterlife, they still serve to fulfill both purposes – but now they are mindless and without human frailties. Nothing more than bones, they constantly test the resolve of the men who fight against them.

Legions fight in tight formations two ranks deep. Tall shields bolster the front while long polearms do damage from the rear row. A formation like this does not mindlessly charge, but slowly advances to make better use of its shields and weapons. With no ranged support, the legion prefers to walk down its enemies slowly and carefully. So it follows that anything which can disrupt their formation – such as abilities, hills, or forests – also disrupts the fighting effectiveness of the legion.

This game has a fun story with lots of different ways to play it out. Play it several times to earn all the achievements.. Some games just grab you...this is one of those times. So simple, yet so entertaining. The sounds, movements, controller ability, are all great!! I don't know why, but I really do enjoy this game. Im one of those guys who likes sim games, I have ETS 2 as well as ATS. Some thing about making money,working hard to purchase new equipment, planting sweet crops and eventually just becoming a millionaire. There's so much in this game to do. Ive stuck to crops mainly, havent got to forestry and livestock or anything yet. Only thing I don't really like is hired help, how they can miss portions of your fields if your field isn't exactly square ill say. So im kinda in the process of figuring out where to start on each field so I dont have to keep an eye on them and just do my own thing. I can't believe ive spent 50hours on this game already. I played about 40 hours of it and figured out I dont like the way I pursued certain equipment without really looking over the details of the equipment and what kind of power you need to run things. So im like, forget it, now I know more about the game.....after 40 hours of playing it. So I completely started my game over and its still been very enjoyable redoing a lot of what I already did. I really like this game and highly recommend this game to people who like sim games, like relaxing/kicking back and are willing to basically put a LOT of time into this game. Overall, great purchase, im sure FS 17 will be more awesome.

. So... Um.. What was the difference between the normal and the Director's Cut version? I mean, shouldn't there be at least some form of nudity if in the description it does say "uncensored"? I feel kind of ripped off, even if the DLC was free. Game's fun though, if you like jiggling plot, and non-linear plot curves.. This is probably the best YDKJ game out there. It has my favorite announcer and its a ton of fun to play (even though its old). currently free on indiegala

For a \$30 (plus) game - it feels like it is still in beta.

The in-game/gameplay HUD textures look low-res. The back-story profile you can pick for your character reads like it was thrown together quickly. The summoning/spell specialization feels sloppy. There doesn't seem to be a good back-story like dragonfall.. I do not expect much when it comes to these shovelware. The name says it all: reference to Russians, there's football and the drunk "defenders" and homeless people in the background explain a lot - might I say they add to the atmosphere?

It all comes in this package that is awfully familiar as it reminds me of those Flick Football games I used to play on my smartphone. So, when you have that as a basis why not add to it? Why mishmash its various elements without coming up with any original idea?

The levels are annoying. After the first couple of stages the number of defenders greatly increases. The only way to score a goal is to click V move the mouse while the ball is in the air. This is how you translate this basic tapping action from your smartphone into the PC language. If only there was a tutorial explaining it not to mention the needed learning curve.

No. It's just levels and achievements and all this is done in 30 minutes. As for soundtrack you'll make do with the "anchorman" whose voice (which here only means the acknowledgement of a goal) could easily get an award for being the most annoying in gaming history.

Avoid it if you can. There are better V easier V more interesting games (even in this "genre") you can easily complete 100%.. You get what you paid for, 5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.. It looks nice. If you install any kind of wheels on this car, they will become bigger to fit with the car :D

I recommend it.. Tidalis takes falling-block-style puzzlers to the next level, and then so many levels beyond "the next level" that it's very difficult to classify. Does it involve matching blocks? Yes, but that's a cop-out answer; there are so many variations and options that this is the ultimate game in its category, and not just because it's the only game in its specific category. It's better than games in other similar categories too:

Tidalis is alone in a category of games far superior to other games to which they might be compared based on screenshots or videos. Tidalis is very polished and is still being developed, years after release, because its developer is committed to the game for the players' sake and for the sake of quality gameplay. An unbelievably large number of options exist, including full support for "disabled" gamers and networked and same-pc competition and co-op games, and a campaign mode for loners or players who want to learn the many facets of Tidalis at their own pace.. Game freaking sucks thank god i did not buy it only wasted 450 points off [Tremmorgames.com](http://Tremmorgames.com). Bad performance, and it wasn't clear what I was supposed to do. The hatchet disappeared when I put it down on a shelf. It didn't seem to do anything anyway.. i like it so far. PROS

- Great and tense atmosphere
- Interesting concept and execution
- Polished pixel-graphics and color palettes
- Small but memorable map

#### CONS

- The Kraken boss
- Literally... just the Kraken boss
